## Who we are

HTS TENTIQ creates space for great things – in line with our belief that there is an ideal space solution for every sector and every application. We have occupied a leading position for more than 20 years with our expertise in development, manufacturing, quality, selection, technology, customer service and innovation made in Germany. We create temporary and innovative space solutions for your future projects within the shortest possible time window.

Our multifaceted offerings leave nothing to be desired. Whether bespoke designs or sector-specific solutions, we implement all requirements rapidly and seamlessly thanks to our comprehensive technical expertise. Continuous product development, flexibility, quality, sustainability and reliability are the preconditions enabling us to serve our customers with best-in-class products in the sector and to deliver premium service worldwide. HTS TENTIQ not only creates space, however – it also adds value. To this end, we always keep the bigger picture in mind – our environment is just as important to us as our employees and fellow human beings. Benefit from our many years of experience: Our highly qualified team will advise you extensively, competently, with a strong focus on ensuring that you are equipped with a building system perfectly suited to your requirements.

# Event Tents

Needing space for special events? In choosing HTS TENTIQ premium and robust Event Tents, event organizers and tent rental companies are making the perfect choice. By meeting specific requirements, our structures offer everything needed to make an event a success: the perfect balance of aesthetic appearance and design, along with customised, versatile options for indoor and outdoor areas. Whether in-house exhibition, catering, hospitality location or company sports event, we can offer the ideal solution with our professional tent systems which cover every sector and all kinds of events.

HTS TENTIQ structures offer you many benefits: Our Event Tents can be set up and dismantled quickly and efficiently. The individual components are hallmarked by durability and reliability. And the best is yet to come: We have customised solutions to suit all budgets, which is why we have an extensive range of Event Tents for you to choose from. Whether square Pagodas, Large contemporary Marquees for major events, luxury hospitality structures or tents built precisely to customer specifications, take advantage of our virtually unlimited range of options and possibilities.

# Special design featuring a high peak roof

## Pagodas □

The main features of our Pagodas include striking, high-peak roof profiles where proven tent technology meshes with innovative stylish design, all combined for an architecturally and aesthetically pleasing look and yet highly functional tent.

Our Pagodas are available in sizes from 3.00 m to 20.00 m. Flexible configuration makes our Pagoda an ideal choice for a wide range of events. The Pagoda's elegant design is sure to be an eye-catcher, whether as a reception area or for merchandizing, at weddings or at catering events.

### Features

- Available in square units of 3.00 m (9 m<sup>2</sup>) - 20.00 m (400 m<sup>2</sup>)
- Pagodas can be seamlessly interconnected with other units to create larger sizes and the option of multiple configurations
- Units from the Pagoda series feature component parts which are mostly interchangeable
- Certified for wind loads according to German DIN EN 13782 standard (80 km/h or 102 km/h, or depending on the tent size)
- All Pagodas can be extended by a wide range of accessories, including glass or solid facades, doors, canopies, various floor systems, interior trim applications and so much more

## NIZZA

Our small lightweight NIZZA Pagodas are a great favourite: suitable for fast installation with integrated functions including quick pins and keder rails for fixing the roof cover, all clearly advantageous when it comes to flexible use at events.

NIZZA Pagodas come with a choice of floor systems, also with steel-aluminium substructure with wooden floor or cassette floor with 3-layer boards.

- Quick setup and dismantling
- Can be set up in a complex of up to 4 Pagodas, providing space of up to 20 x 20 m
- Available with single-layer PVC covers (with windows on request), transparent polyglass covers or with solid facades of ABS elements or glass facade
- Available in square units of 3.00 m (9 m<sup>2</sup>), 4.00 m (16 m<sup>2</sup>) and 5.00 m (25 m<sup>2</sup>)
- With side height: 2.50 m and frame: 63 x 63 x 2 mm (3-channel profile)

## LONDON

Our LONDON Pagoda features a stronger, more robust frame with integrated 'foldable legs' for convenient installation requiring a minimum of manpower.

## AVANTGARDE

The horizontal AVANTGARDE glass panels give the structure a luxurious appearance and will make a lasting impression on your visitors.

## CANNES

The compatible, lightweight CANNES Pagodas can be set up quickly and flexibly. They are compatible with other structures, making them an ideal choice for all types of events.

Case study

# Pagoda Tent as a restaurant canopy

Pagodas are very versatile in their application scenarios, as shown by a project involving holiday resort in Vietnam which required a canopy for its outdoor restaurant. The structure had to be designed to meet special requirements for stability due to the location. The elevated position of the restaurant and coastal position, together with the yearly strong winds and storms in the region, meant the structure needed to be designed to a higher specification than a standard Pagoda. The aim was to supply a canopy that fitted in well with the overall appearance of the exclusive resort while making maximum use of limited space.

## Requirements

A premium holiday resort involving a large site of secondary residences in central Vietnam contacted HTS TENTIQ as it needed a Pagoda Tent to cover one its exclusive restaurants. The elevated location of the restaurant, situated close to the coast, and the strong winds and storms in the region meant that the structure had to withstand more demanding conditions than a standard Pagoda.

## Solution

HTS TENTIQ's flexible and technologically advanced design and production capabilities enabled the production of this customised Pagoda. With a side height of 2.40 m, a large Pagoda was developed and installed to withstand the extreme weather conditions of the region and the coastal location.

## Uses and benefits

Since the Pagoda's installation, the construction enhances the resort with its striking features which take contemporary design to the next level. The Pagoda offers guests a fitting backdrop for an exclusive outdoor dining experience with fabulous views of the coastline through the open sidewalls. The specific weather conditions in Central Vietnam allow guests to enjoy and relax in the resort throughout the entire year.

# A practical tent system with interchangeable components

## Party Tents □

Create the perfect ambience for any celebration with HTS TENTIQ Party Tents. The product lines combine clear design with tried-and-tested top-quality. Our first rate tent systems impress with their elegance and professionalism – all attributes which make them big favourites in the category of modular Party Tents with event organizers and tent rental companies. The ongoing success of our tents is due in particular to our continuous development:

Our systems score points with their optimized ease of assembly, along with their flexibility and low transport volumes. Party Tents come in a variety of shapes and sizes with free span widths of 3.00 m to 10.00 m and bay distances of 3.00 m to 5.00 m. Thanks to the flexibility of their configuration, our reliable and light tent systems are the ideal choice for a wide array of events and applications.

### Features

- Lightweight, but nevertheless sturdy tent systems in a range of different designs
- Exceptionally fast setup and dismantling compared with other systems in the market
- The majority of components in the Party Tent series are interchangeable
- Available in free-span widths of 3.00 m, 4.00 m, 6.00 m, 8.00 m, 9.00 m and 10.00 m
- All Party Tents have been tested for wind loads and comply with the German DIN EN 13782 – 80 km/h standard (0.30 kN/m<sup>2</sup>)
- Eave heights of 2.30 m, 2.40 m and 3.00 m
- Virtually unlimited incremental expansion depending on the system
- Upgradable any time through adding various different accessories, including flooring systems, solid ABS and glass facade, door units and interior trim applications

# A comparison

## RÖDER HTS Party Tent

This tent system combines user-friendly features, including fully interchangeable components. Storage, transport, setup and dismantling are fast, easy, and handling efficient. Our RÖDER HTS Party Tents come in different shapes and sizes with free-span widths of 3.00 m to 10.00 m and standard eave heights of 2.30 m. The length is unlimited with a bay distance of 3.00 m. Along with the standard roof design (A-frame), curved (with a round ridge connector), high peak and hipped (in hexagon or octagon design) roofs are also available.

- Exceptionally fast setup and dismantling compared with other systems in the market
- Röder HTS Party Tents have been tested for wind loads and comply with the German DIN EN 13782 – 80 km/h standard (0.30 kN/m<sup>2</sup>)
- Upgradable any time through adding a range of different accessories, including flooring systems, solid ABS and glass facade, door units and interior trim applications
- Most favourite Party Tent System

## ROMA Party Tent

Our ROMA Party Tents combine the advantages of Party Tents and Large Marquees in one. These tents come in free-span widths of 4.00 m to 10.00 m with a bay distance of 5.00 m, which reduces the amount of material needed and makes setup and dismantling easy to handle. Optionally extendable in a 5.00 m increments, with side heights of 2.30 m or 3.00 m.

- Single-layer PVC covers (with latticed windows on request)
- Popular alternative offering all the benefits of Marquees and Party Tents
- Compatible with the tent systems of other manufacturers
- Available in a range of different floor systems, including steel-aluminium substructure, with wooden floor or cassette floor with 3-layer boards

### Your project, our solution

Are you looking for a Party Tent? With us there's no need to look further. Our experts will work together with you to identify the best solution so that you receive a product tailored precisely to your requirements.

## HÖCKER Party Tent

The lightweight, small to medium-sized tents are quick to set up and dismantle, offering versatile combinations with standard A-frame roofs, hipped roofs, as well as curved or high peak roofs.

## TEC-SPAN Party Tent

TEC-SPAN structures are Party Tents which are compatible with other Party Tent Systems. They also come with an A-frame, curved, hipped or high peak roofs.

Case study

# Racecourse hospitality suite

After hiring Party Tents for a number of years, a racecourse operator in the UK decided to purchase a permanent event structure. The requirement was to set up the Marquee in the direct proximity of the home straight to give guests an exclusive view of the race while offering them full hospitality at the same time.

## Requirements

Based in the south of England, Lingfield Park Racecourse is a well-known venue, particularly among the horse racing community. Meetings are held over all three racings codes, jumps, flat and all-weather – making Lingfield Park one of the busiest racecourses in the United Kingdom. In recent years, the event organiser had already gained very positive experience of HTS TENTIQ and appreciated the company's holistic approach to service. With this in mind, the organiser decided to purchase an Event Tent and set it up just past the winning post to cater for race day hospitality and other non-race days.

## Solution

The requirement at Lingfield called for a 9.00 m wide x 12.00 m long aluminium Party Tent with a side height of 2.30 m, a fully integrated floor system with wooden flooring and an ivory interior pleated lining to the roof and walls. The position of the construction necessitated window covers around two elevations to give hospitality guests a fantastic view of the home straight.

## Uses and benefits

The Party Tent was built in one day and has proven an outstanding success for the racecourse. All visitors and guests are now catered for against a stylish backdrop, as suits the occasion.

The Party Tent is also used as a unique location for other events, meetings with a special flair or after racing shows, for instance.

The modular design of our Large Marquees enables us to accommodate your individual requirements.

Case study

# Mobile Event Structure offers flexible outdoor areas

A special day calls for a special location: A hotel in the north east of France contacted HTS TENTIQ to provide a temporary solution for hosting weddings and open air events. In addition to the hotel's main function room, the plan was to increase event capacities on a flexible basis.

## Requirements

An enquiry for a flexible Event Structure came from a luxury hotel specialised in hosting weddings and events located in Alsace in the north east of France. The hotel's main function room seated 45 guests. The venue's stunning woodland and outdoor landscaped grounds were also to be used as open air event space in good weather. With its plans to increase the number and size of functions, the hotel needed an additional space which was somewhere between these two options: providing an indoor space, outdoors. The obvious solution was a temporary event construction which could remain in situ during the summer months and be dismantled and stored over the winter.

## Solution

In keeping with the theme of an indoor space outside, HTS TENTIQ supplied a temporary event structure with panoramic polyglass walls and roof panels. The solution provided all the comforts of indoor ambience, while ensuring a view of the beauty of the natural surroundings. On this occasion, the structure was assembled in cooperation with an event partner of the company. The temporary event structure has been christened 'The Pergola' and can host up to 120 guests. It now serves as a brand new outdoor event space offering all the luxury of an open-air event venue. The Pergola's setting, next to natural woodland, while nevertheless close to the hotel for washroom and catering facilities, is quite simply stunning. Depending on the weather, the wall panels stay open or closed, which intensifies the outdoor experience in nature, while the sturdy, attractive parquet floor enhances the overall appearance and atmosphere.

## Uses and benefits

From a commercial standpoint, the hotel is now able to offer just about every type of event space imaginable - ranging from small intimate parties indoors to large scale outdoor events, with weather protection and temperature control if needed.

# Innovation and quality which speak for themselves

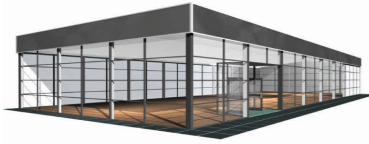

## Premium □ Event Structures

Make way for your hospitality event! Our Premium Event Structures create space meeting the highest standards and provide the ideal backdrop for your event. Whether single- or multi-level, with veranda or balcony on one side or circumferencing, premium is a byword for our Event Structures. Our space solutions impress with their style and unique appearance. HTS TENTIQ offers structures with high quality glass or insulated facades designed for maxi-

mum impact. Our structures are extremely versatile in terms of their use: as offices, for seminars, trade fairs, for major events such as motor sports or in hospitality. However you choose to use them, our structures will put your event centre stage. Our buildings combine comfort, high quality and a multitude of options for branding on the facades and wall systems.

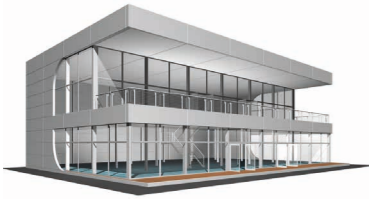

### Features

- Standard models available in widths of 10.00 m to 30.00 m
- Unlimited expansion by adding modular extensions in 5.00 m increments
- Custom heights
- Upgrading thanks to bespoke equipment and fittings
- Premium Event Structures are manufactured in accordance with the German DIN EN 13782 standard to withstand wind loads of up to 102 km/h (0.50 kN/m<sup>2</sup>)
- Technical modifications for other regions of the world are possible – please contact us
- Innovative design characteristics enable the installation of multiple features, both interior and exterior, including galleries, balconies and terraces, with a view to fulfilling our customers' requirements
- Aesthetically pleasing and functional accessories, including interior and exterior stairs, insulated glass or solid facades, doors, lighting and air-conditioning

### Manhattan Single-Level

The Single-Level Structure is generous, equipped with an attica and a flat roof optics, and ideally extendable in 5 m increments.

### Manhattan Multi-Level

Multi-Level high-end Event Building with flat roof optics. Extendable at will in 5 m increments.

## Manhattan

Our innovative Manhattan product line combines a stunning look with the highest functionality, making it the perfect solution for short- and long-term usage. In pioneering these space solutions, HTS TENTIQ has made a name for itself worldwide.

- Quick setup and dismantling possible
- Designed for flexible use, whether for racing events, company festivities or for weddings
- Innovative design features enable the installation of multiple features, both indoors and outdoors, including galleries, balconies and terraces, with a view to fulfilling our customers' requirements

## ICON

The ICON design stands out with its striking, next-generation exterior, innovation and quality. The entire system can be fully and individually configured as desired. Extension options include generous roofed terraces featuring a self-supporting canopy and offering an optimal view of the surroundings.

- Quick assembly and dismantling
- Innovative system designed for flexible use in high-end events
- ICON structures excel through their unique and special design features, such as an angled facade and a curved roof.

### ICON Single-Level

Expansive, Single-Level Event Structure with a free-span curved roof and angled walls. Extendable in 5 m increments.

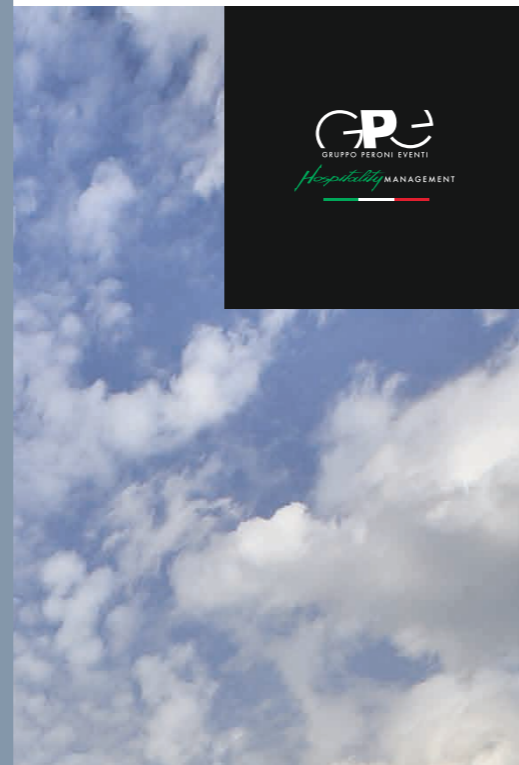

### ICON Multi-Level

Impactful, Multi-Level design with a striking look featuring a curved roof and angled walls. Extendable in 5 m increments.

Case study

# Hospitality lounge for Gruppo Peroni Eventi

Together with its Italian customer Gruppo Peroni Eventi, HTS TENTIQ developed a flexible, single-level premium event complex. The exclusive event and hospitality lounge provides a stylish backdrop for the Lamborghini Super Trofeo Europe 2022. The oldest Lamborghini Championship takes place in six events on Europe's most famous racing tracks.

## Requirements

Special requirements were placed on the exclusive event and hospitality lounge: The single-level bespoke premium event complex was designed to be highly functional and efficient to allow easy setup on site - with a flexible layout capable of being modified to suit the local environment. Enabling multiple installations under the most difficult conditions was also part of the requirements, as the racing series 2022 is to be held at six different locations. At present, Gruppo Peroni Eventi is Lamborghini's exclusive partner and is renowned for its professional planning, design and management of premium events throughout the whole of Europe.

## Solution

In using the high-class event buildings from the Manhattan product line, HTS TENTIQ exceeded the expectations of its Italian customer Gruppo Peroni Eventi. The single-level 750m<sup>2</sup> premium space solution designed for modular combination provides sufficient room for high-end VIP hospitality on site. Facility options range from the lounge, service area, terraces and offices, right through to fully equipped kitchens.

## Uses and benefits

The Manhattan premium complex's flexible and highly functional structure enables it to be customized and efficiently set up to suit the various venues. Moreover, the complex is designed to be extremely robust and to accommodate multiple installations under the most difficult conditions. It can be extended to adjust to local conditions and future requirements.

HTS TENTIQ performed impressively and has succeeded in creating a unique experience for VIP guests, racing teams and the employees or personnel of the Lamborghini brand.

# As unique as events themselves – Custom Structures

## Custom □ Structures

Create an impressive setting for your event – our product line of Custom Structures demonstrates the huge potential of our tent systems. The elegant appearance of the highly evolved structures often disguises the fact that they are actually tent structures. We are able to realize large, free-span spaces up to three storeys high. Whether cube shaped with a flat roof, multi-peak, a star-shaped tent or a structure emulating a cathedral with its breathtaking interior heights: our tent systems are the future already made a reality.

### Features

- Depending on the shape, widths of up to 60.00 m
- Virtually unlimited expansion by adding modular extensions in 5.00 m increments
- Custom heights
- Upgrading thanks to bespoke equipment and fittings
- Custom Structures are manufactured in accordance with the German DIN EN 13782 standard to withstand wind loads of up to 102 km/h (0.50 kN/m<sup>2</sup>)
- Technical modifications for other regions of the world are possible – please contact us

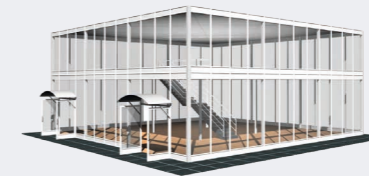

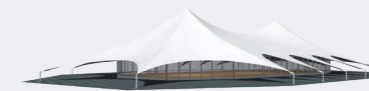

## Selection of Custom Structures

**Multi-Peak Structure**  
Single- or two-storey structure with multi-peak roof, and optional terrace or balcony.

**Cube Multi-Level Structure**  
Two- or three-storey cube-shaped event building with flat roof, with or without surrounding balcony.

**Star-Shaped Tent**  
Star-shaped roof design. The wide range of shapes we offer also caters to exceptional requirements by offering precisely the ideal spatial solutions.

**Cathedral**  
Unique cathedral design offering breathtakingly spatial dimensions. Reaching skywards, the design makes an exceptionally festive impression.

### Your project, our solution

Our Custom Structures are manufactured in accordance with customer specifications, enabling the design of unique solutions and reflecting your requirements for distinct, striking appearance and functionality.

# Curved Roof hospitality structure for Porsche Cup

The Porsche Carrera Cup held in the UK sends their fans' hearts racing. HTS TENTIQ was commissioned by a customer from the racing scene to support all ten races of the Cup with a custom solution. Being such a popular race, the solution also had to have the capacity to accommodate 600 to 800 guests. Further requirements involved finding a visual solution appropriate for the occasion, with easy-to-handle temporary assembly and dismantling.

## Requirements

HTS TENTIQ customer MDM was appointed by Porsche UK to complete and operate the new Carrera Cup racing centre. Every year the building makes the rounds of all ten Carrera Cup races in the UK and hosts 600 to 800 guests at racing weekends, forming the centrepiece of the championship. During the entire racing weekend, all the relevant information runs over the centre, while full catering is organized for the team, drivers, sponsors and guests.

## Solution

Working closely with MDM, HTS TENTIQ developed a unique temporary hospitality centre. The structure incorporated a curved roof fitted with an insulated thermo roof system. The integrated cassette floor system with cassette boards is specially fitted with a grey, non-slip vinyl finish. Special features of the hospitality structure include 10.00 m portal beams which created a 10.00 m clear internal side access to the trailers housing the restaurant and merchandizing areas. The structure also featured a curved roof which creates a unique entrance to the building.

## Uses and benefits

Along with the actual race, the racing hub has been designed specifically for the customer as the perfect hospitality structure at the heart of the racing event able to accommodate a large number of guests at various Porsche's events. The hub also provides many merchandising opportunities, offering clothing, fan articles, as well as enabling the drivers to sign autographs.
